www.electronicind.com

What keeps Electronic Industries above and beyond the competition?

- Family owned and operated since 1955
- Customer service and satisfaction excellence
- Uncomparable knowledge base
- Sourcing experts can find *anything* for you
- Broadline product offering — access to thousands of manufacturers

Electronic Industries is an electronic parts, components, tools and supplies distributor. We are a growing network of manufacturers, suppliers and customers who offer value without compromising quality, knowledge and expertise. We continually strive to meet the needs of our customers by offering an extensive blend of products and services. We go to great lengths to ensure customer satisfaction and are proud of the customer relationships we have built over the last 60 years.

Services

Assembling
Do you have parts that you use in your production that require assembly before they are used? Would you like to receive them pre-assembled? EI can do it! Work with our Sales Rep and we will work with your requirements to take it off your hands and put it in ours.

Barcoding
Choose from a variety of bar-code standards including 2D bar-codes. Increase your productivity, cut down on receiving errors, and simplify your receiving process with the help of our automated barcode printing system.

Custom Labeling
Do you want your part numbers, PO number, line numbers, supplier ID, etc. to appear on labels? No problem! Design your own label or let us design it for you. We label each item, package and shipment the way you want it, based on your requirements.

Electronic Data Interchange
EI is EDI capable! Save time and eliminate mistakes with EDI. Once the documents are mapped, sit back and let the computers do the work! From POs to invoices, we've got you covered. Ask your Sales Rep how you can start saving with EDI.

Free Local Delivery
Stop paying freight charges! If you are located in our delivery area, we can deliver your order free of charge. You can also pick up your order at our walk-in counter during our business hours 8am - 5pm, Monday through Friday. Give us a call or stop by today!

Just-In-Time Deliveries
Let our inventory reduce your stocking costs. Create blanket POs with multiple releases for up to 12 months. Have your shipments scheduled exactly when you need them and rest assured that your inventory will arrive "Just-In-Time."

Kitting
You may have several parts that are used together in an assembly, perhaps a repair kit, or even an entire BOM. Creating a kit cuts down on your time and labor costs. One part number takes the place of many. We can help put it all together, usually without adding any additional cost to you.

Safety Stock
Wouldn't it be nice if there was a distributor out there that allocated stock to you without a PO? Well, look no further because EI provides this service for our customers. Avoid stock-outs due to fluctuations in usage. We won't sell out! Instead, we'll help to keep your production up and running.

Vendor Managed Inventory
This service helps to reduce your on-hand inventory and eliminates stock-out situations. That's not even the best part – we re-order, deliver, and put it all away for you! We'll work together to find the right plan for you and then we'll take it from there. It's just another way that EI can help you save time and money.

Din Rail and Heat Shrink Cutting
Do you need heat shrink or din rail cut to specified lengths? Is doing it in-house cutting in to your bottom line? With quick turnaround and tight tolerances, we're a cut above the rest! Let us quote on your requirements today.
